SUN PATH

Sun path: local clock time (Europe/London), hour marks on each curve, altitude rings at 30° and 60°. Calculated with pvlib for the site centre; terrain and building shading are not included.

ACCURACY

Terrain: about ±15 cm vertical (RMSE) on open hard ground. Lower under trees, on steep slopes and next to buildings. Lightly smoothed for clean cutting. Building footprints and heights are indicative; open data can be out of date.

Desk study for design and model-making, not a survey. Do not use for setting out, construction, legal boundaries or flood assessment.
